## A GRAMMAR, \&c.

Tus history of the Hottentot race is intimately connected with the rise and progress of the Cape Colony. This people were the aboriginal inhabitants of the greater part of that portion of Southern Africa which is now subject to British rule, but have been deprived of their land, and gradually reduced in numbers by the rapid and irresistible advance of civilized man. Much valuable and interesting information respecting their character, manners, and customs, has already been collected in the books of travellers and in other works; but, until very recently, their language has been a much neglected subject of enquiry. Its harsh and peculiar sounds have probably deterred many from grappling with its difficulties, and making it a field of philological researeh. Before the commencement of Christian Missions and the abolition of slavery, the aborigines were held in servitude and contempt by the Colonists, they were seldom regarded with philanthropy, and few efforts were made for their instruction and elevation. The very nature of their intercourse with the Colonists, forced upon them the language of the whites, and paved the way for the gradual extinction of their own. When the Missionary Socicties of Europe turned their attention to South Africa, their agents found numbers of the Hottentots conversant with the Dutch language in which they commenced to communicate religious instruction to them. Wherever the native language still prevailed interpreters were employed, until the Missionaries had succeeded, not as has generally been the case with foreign Missions, in learning the language of the
aborigines, but in teaching them theirs. With reference to those Missions which have long been in operation among the Hottentots within the Colony, or those on its immediate border, the event has justified the course pursued: from a Hottentot a click is seldom heard.

A few Missionaries, however, have taken an interest in the Hottentot language, and have published several small works in it. These might have sufficed but for two reasons. First, Several tribes of the Hottentot race, and some others who speak the same language, are so remotely situated from the Colony, that it is highly probable a considerable time will elapse before they shall have formed a sufficient acquaintance with cither the English or the Dutch language to enable them to dispense with their own, however certain its ultimate extinction may appear to be. For these it is necessary to provide translations of Scripture, in order to instruct them in the truths of Christianity. Secondly, It will be interesting to preserve some additional record of the language spoken by a people so peculiar and once mumerous, as it may assist in tracing their descent, and removing the obscurity in which their origin is at present involved.

These two reasons have induced me to compile a sketch of the Grammar of the Namaqua Hottentot dialect, which will form a basis for more critical and philosophical research into its structure and general principles.

The following are the different dialects spoken by the several varicties of the Hottentot race:-

The Hotlentot proper, which was spoken by the tribes that inhabited the greater part of the Districts now comprised in the Cape Colony. This dialect is almost extinct. A few who are still conversant with it may be found in the back settlements, and along the Eastern frontier. Two or three of the lepers at the Robben Island Establishment converse in it with fluency.

The Coranna, which is spoken by the tribes inhabiting the banks of the Orange River, and by others in the
vicinity of the Vaal and Modder livers, with a few stragglers who have branched off from these towards the interior.

The Namaqua, which is used by the tribes of Little and Great Namaqualand, and by the Berg Damaras. It has not yet been satisfactorily ascertained how these two races, so essentially different in many respects, have acquired the same language; the probability is that the Berg Damazas were formerly in a state of vassalage to the Hottentots.

The Bushman, which is spoken by numerous roving clans who inhabit the desert and mountainous tracts of the interior. Their dialect is, in its turn, subdivided into numerous brogues, some intelligible, and others unintelligible, to the other varictics of the Hottentot family. They exceed the Hotientot in the uncouthess and barbarity of the sounds of which they are composed, but sufliciently resemble it in grammatical structure to shew that they belong to it.

To shew what has already been done towards the formation of a Hottentot literature, we append the following list of works that have been published in the several dialects :-

[^0]It appears that the most has been effected in the Namaqua Hottentot dialect, and as that is still extensively spoken, and the Rhenish and the Wesleyan Missionary Societies are vigorously prosecuting their labours in Namaqualand, it is probable that Scripture translations will continue to be made in that dialect. It is hoped that this
small work may prove not only interesting to the curious, but also of practical utility to Missionaries among the Namaqua Hottentot tribes.

## I. ORTHOGRAPHY.

In reducing a barbarous tongue to a written form one of the first and principal difficulties which occurs is the construction of an Alphabet. This difficulty may be the more easily surmounted if it be found that the Roman Alphabet contains sufficient signs to represent all the elementary sounds which compose the language to be formed. In such a case the shortest and easiest method is to avail ourselves of their aid, and, by so doing, obviate difficultics which would arise from the construction of new characters. As the letters of the Roman Alphabet, which are commonly in use among European nations, are merely arbitrary signs, and have, properly speaking, no definite power, except such as may be assigned to them by common consent, we may, until such consent shall have established uniformity in the power of letters, give them such sounds as may scem most proper and natural; being guided, however, as far as practicable, by analogy', and the genius of the language concerned. If it be found that new elementary sounds occur, they will have to be represented by new characters, unless, on the other hand, there be characters in the Roman Niphabet which have no corresponding sound in the language which has to be reduced, when there will be no reason why these should not be appropriated to meet the deficiency of signs which would otherwise occur.

It is on this principle that the orthography of the present work and some manuscript translations has been determined. The Namaqua contains articulate elementary sounds which hase no representing signs in the Roman Alphabet, and the latter contains signs which either have no corresponding power in the Namaqua, or may be adequately represented by some of the other characters. It
will be very casy, then, to let those signs which are superfluous with respect to the Namaqua stand for the sounds which are extraordinary and unrepresented. The alphabet of the Kafir language has been modelled on the same principle. C, $Q$, and $X$, have been spared to stand for the clicks which the Kafirs have borrowed from the Hottentots, and $R$ for the guttural which occurs as an elementary sound.

In the absence, then, of any approved Universal Standard Alphabet, as the Roman Alphabet affords sufficient signs to meet the exigences of Namaqua orthography, it would be useless to invent new characters, and the clearest, simplest, and most convenient way would be to confine ourselves almost exclusively, if not entirely, to those which are so readily at command.
'These views have been controverted, and the orthography of those works which have already been published in the Namaqua Hottentot dialect has been based on an opposite view of the question. "The Four Gospels" have signs for the clicks; but although the translation must have been a work of great labour and application, the system of orthography followed by the late respected translator was essentially defective, and consequently the work has never been of any practical utility. "The translation of the Gospel of Suke," is based on a regularly constructed and copious Alphabet, but here also the following signs are employed to mark the clicks-(' ':. ). These, from their similarity to the stops used in composition, and from their being used for that purpose in the same work, can hardly be considered a happy selection. Professor Wailman has adopted nearly the same orthography in the short sketch of Namaqua Grammar which he has prepared. But although this system can thus claim the sanction of precedence as far as the Hottentot dialects are concerned, room is left for a fair trial of the system alrealy sketched, which has in principle been so successfully employed in the Kafir literature.

It would, however, be better that both systems of orthograplyy should give way to an, approved universal Alphabet. The sulject of a uniform orthography has recently engaged the close attention of eminent linguists and philologists in Europe ; and among others, Professor Lepsics, of the Berlin University, has proposed an Alphabet which has been very generally adopted or recommended by the great Protestant Missionary Societies of England, France, and Germany, and upon which several works on Afticm languages have already been based. The directors of the Rhenish Missionary Society, who are decply interested in Namaqua Missions, have relinquished the system of Knudsen and Wailman, and have instructed their Missionarics to adopt that of Lepsius. The able Professor, in froming his Alphabet, has found it necessary to invent new signs for the clicks, and by the aid of thesc all the elementary sounds of the Namaqua stand clearly represented. For the sake of uniformity, as well as on account of other advantages which Lersius' system affords, it will be best to waive all objections and adopt it. In the mean time, however, as considerable delay has already retarded the publication of this small work, and as the requisite type to carry out the system of Lersius in its application to the Namaqua language is not at hand, it has been thought better to proceed with the undertaking at once, and, if it be decmed advisable, to issue another edition in the orthography of the Standard Alphabet, as soon as circumstances will permit. The transposition will be merely a mechanical process.

## LETTERS.

There are twenty-seven letters in the Namaqua Hottentot language, which are arranged as follows:-

Vowels :-a, c, i, o, u.
Consonants:-b, d, f, g, gh, kh, h, h, l, m, n, p, r, s, t, w, y, z.

Clicks:-c, $q, v, x$.
Letters. Nomrs. Powers. ExampleA.

The sounds in the Roman Alphabet represented by f, 1, and $y$ are not found in the Namaqua Hottentot, the characters are, therefore, only inserted to provide for the introduction of foreign words, as:-Faro, Ghalilea, and Yohanip.

The sounds for which $x$ and $v$ commonly stand likewise do not oceur.

The hard and soft sound of $c$ may be expressed when necessary by $k$ and $s$.

A caret $\wedge$ marks the strong nasal accent which ofteu occurs as,-má, té, xná.

## rowiss.

The rowels preserve in all places the same radical sound, the only variation being in the act of enunciation. They are long and short. As a general rule they are long in accented syllables. All the rowels are invariably sounded. The genius of the language seems to require that vowels should rather be added, for euphony's sake, than elided.

The following examples xvill illustrate the quantities of the vowels:-

| a long, as in mas. | short, as in van. |
| :--- | ---: |
| c ", ", be. | ", ", ke. |
| i ", ", zi. | ""," mari. |
| o ", ", vo. | "",", coro. |
| u ", mû. | ",", kuru. |

DIPITHLONGS.
The Namaqua has the following rather copious list of diphthongs,-ae, ai, au, ei, oi, ou, ui.

Close attention must be given by the learner to the sound of these combinations of vowel sounds, as many nice distinctions depend on their correct prommenation.

When the rowels which in combination form a diphthongal sound, have to be sounded separately, the latter of the two is marked by a dirresis, as, -ghoailke, it is written.

Nasal diphthongs take the circumflex over the first vowel, as,-qkäi, qóu.
cossonants.
The Consonants proper to the Namaqua language may be thus divided:-

Labials:-b, p, m.
Dentals:-t, $d, z, s$. Palatal:-g, k, h, gh, kh. Lingual:-n, r.

We are of opinion that $B$ and $P$ are both needed to meet the requirements of the language; this will be seen from the following examples :-

$$
\begin{array}{ll}
\text { berip, bread. } & \text { pirip, a gruat. } \\
\text { lhoip, a mall. } & \text { burll, to wonder. }
\end{array}
$$

The same may be said of $D$ and $T$, as is evident from the following examples:-

$$
\begin{array}{ll}
\text { dumis, houcs. } & \text { teni, to carry. } \\
\text { di, to do. } & \text { te to ask. }
\end{array}
$$

Gh is a soft guttural, as in the Dutch word guan.
$K \%$ represents a much deeper and harsher guttural than gh. We have no corresponding sound, either in English or Dutch, by which to illustrate its power.
'These two letters are simple sounds, though represented by compound consonants. In spelling, they are pronounced at a single articulation, without separating the combined characters; thus ghun is spelt $g h-u-n$, and not $g-h-u-n$. Khap is spelt $k h-a-p$, not $k-h-a-p$.
$Y$ is only used as a consonant at the beginning of a sentence or word; its vowel sound is represented by the diphthongs ai and $e i$.
$W$ is a semi-rowel, and at the begiming of syllables and words is sounded like the English $w$.

## CIICRS.

The elicks constitute the most peculiar feature of the Hottentot language. The principal, if not the only, difficulty to a European of ordinary capacity and industry, in leaming it, consists in these strange and barbarous articulations. They occur so frequently, and form such an important part in the root of many words, that they appear to have become an essential element in the language, and could not be dispensed with unless it were entirely reconstructed.

In pronouncing the click simply by itself, without any supplementary vowel or consonant sound, the breath, instead of being thrown out as is usual with other articnlations of the voicc, is checked, or drawn inward, but as
soon as it is combined with any other sound it is strongly ' emitted. It is difficult to speak the Namaqua fluently or intelligibly, until the art has been acquired of checking and aspirating without any perceptible interception of the breath.

We denote the four clicks which are heard in the Namaqua Hottentot by the characters $c, v, q$, and $x$.
$C$ is a dental click; it is sounded by pressing the tip of the tongue against the front teeth of the upper jaw, and then suddenly and forcibly withdrawing it.
$V$ is a palatal click, and is sounded by pressing the tip of the tongue with as flat a suiface as possible against the termination of the palate at the gums, and removing it in the same mamer as for $c$.
$Q$ is a cercbral click, according to the Alphabetic system of Ifrpsius.* It is sounded by curling up the tip of the tongue against the roof of the palate, and withdrawing it in the same manner as during the articulation of the other clicks.
$X$ is either a lateral or a cerebral click, that is, it may be sounded cither by placing the tongue against the side tecth, or by coicring with it the whole of the palate, and producing the sound as far back in the palate as possible, either at what Leersius calls the faucal or the guttural point of the palate. European learners almost invariably sound it as a lateral, and hence their articulation is harsh and foreigh to the native ear. A Namaqua almost invariably articulates this click as a cerebral.
In composition the clicks only occur at the beginning of syllables; they combine with all the rowels, and with a certain number of consonants, which are liquid with respect to them. Whilst the anterior part of the tongue

[^1]is engaged in articulating the click, the throat opens itself to pronounce any letter that is to be sounded in combination with the click, and the sound pronounced at the same time with the click gives it a nasal, aspirate, guttural, or other determination.

It is the most natural and proper way to write the click before every other letter. In enunciation the organs of speech first prepare to articulate the click, and any other sound, either vowel or consonantal, is clearly supplementary.

The clicks ought properly to be classed among the consonants, for although they are by themselyes distinct articulations, yet they cannot be considered complete sounds without the aid of a vowel.

The consonants which can be combined with the clicks are $h, k, g, k h, n$.

The following tables will show all the possible click combinations:-
1.
Click and $\left\{\begin{array}{lllll}\text { ca } & \text { ce } & \text { ci } & \text { co } & \text { cu } \\ \text { va } & \text { re } & \text { vi } & \text { vo } & \text { vu } \\ \text { qa } & q c & q i & \text { qo } & q u \\ \text { xa } & \text { re } & \text { xi } & \text { xo } & \text { xu }\end{array}\right.$

Click, with
Consonant and
IV.

The caret, denoting a strong nasal accent, is often placed over a final rowel, which appears to have the ringing sound of ing, as in ring, sing, \&c., but which is not sounded with sufficient distinctness to warrant our adopting the same orthography as in English. The Universal Alphabet of Lemsius, as he proposes to adapt it to the Namaqua Hottentot, will require his it to meet this case, and his $q$ to represent the deep guttural which wo have denoted by kh. With these two additions it will form a basis for a correct, concise, discriminating, and highly intelligible spelling and syllabification for the Namaqua and all its coguate dialects.

## II. ETYMOLOGY.

The words of the Namaqua language admit of the following classification,-Noun, Adjective, Pronoun, Verb, Adverb, Preposition, Conjunction, and Interjection.

This order corresponding with that generally adopted by English Grammarians, is the most easy and simple. The Article, however, properly belongs to the Noun, as will be seen when treating of that part of speech.

## 1. NOLNS.-TIIEIR IERTFATION.

The genius of the Namaqua language affords considerable latitude for the derivation of nouns. Nothing is required for this process but to take the root or most convenient part of a word belonging to another class, and affix to it a letter distinctive of gender. Sometimes a particle is introduced between the root and the sign of the gender.

1. We have nouns derived from adjectives, as amap, truth; from ama, true : qkheip, cold; from qkhei, cold.

A more numerous class is formed by adding the particle si to the adjective, with the masculine, feminine, or common terminational sign of the gender ; thus from qamu, pure; qkuri, high; qkinu, rich; vo, narrow; qgam, deep; are formed qanusip, purity; qkurisip, height; qkhusip, lordship; vosip, narrowness; qgamsis; depth.
‥ Many nouns are derived from verbs; these follow the same rule of observing the termination by which the gender is indicated with or without an intervening particle; so from cnam, to love; wéi, to think; dan, to conquer ; tanisin, to conduct oneself; musin, to see oneself, we have cnams, love; véis, thought; dansis, victory; tanisins, conduct ; and musinis, a looking-rilass.

For the process of derivation the ront of the verb is employed through all its conjugations. In this service, it is more usual to adopt the feminine than the masculine termination, because, generally speaking, the cuphony of the language is most promoted therehy.
3. Participles, which we regard as integral parts of the verb, assist in increasing the number of words which may form the subject of discourse, and thus emrich the language by extending the range of its essential parts; so from mura, seeing; hara, will be coming; and xnaira, singing ; we derive murap, one that sees; harap, one that will come; and xwairap, one that sings. Nouss formed in this mamer are personal. The Namaqua does not contain any verbal common nouns with a participial termination. Such as correspond in sense with the verbal nouns of the English language are formed in the regular manner from the primitive root of the rerb, as;-andius, a hearing; ghuas, a writing; qküs, a going: from xnfiu, hear; glua, write; and $q$ kî́, go.
4. A few substantives may be traced to prepositions; thus from xaika, between, is formed xaikap or xaikup, the midst; qouka, outside; qoukap, the exterior; qua, in ; gnap, the inside.

Compound Nouns may be formed by the combination of two or more simple nouns, an adjective and a noun, a verb and noun, or a participle and noun; as qhu-khaus, an excavation, or a mining operation, from $q$ hup, ground, and khaus, a digging; qgaru-qhup, a wilderness, from qyaru, waste, and qhup; xhlhaxlhac-aup, a teacher, from skhaxkha, to teach, and uup, a man; cumi-aup, an heir;
from cumi, to inherit, and aup, a man; hara-aaip, the future; from hara coming, and xaip, time. It will be seen that in all combinations of this kind the letter or particle which denotes gender, is essential to the formation and must constitute the final member of the word.

Proper names are formed from nouns, adjectives, verbs, and participles. Any little circumstance attending the birth of a child, or any peculiar feature in the character, manner, or appearance of an individual, will suggest an appropriate appellation.

Thus we have hatup, from ha, to come; vkharis, from whhari, small ; qkubus, from qkubu, round ; qnoughap, from quoup, red clay ; vkuivmubisavkumtis, one-that-does-not-fear-a-multitude.

## notis of meltitude.

Collective nouns, when only employed in the singular number, take the termination of the feminine gender, as: ukiui-vmubis, a multitude; chamis, a collection or assembly. The fominine form of many nouns is taken in a collective sense, as: xkît, a springbok; gumas, a cow; vhums, a locust; which severally become, a flock of springbokis, a herd of cattle, and a swarm of locusts. But when a collective noun is put into a plural form it assumes the terminations of the common gender, as,-vkui-vmubin, chamin, rhumn.

## GENDER OF NOLXS.

In the Namaqua Hottentot we find three genders, the masculine, the feminine, and the common.

These are easily distinguished from each other, for words of the masculine always end in $p$, as khoip, a man; words of the feminine always end in $s$, as khois, a woman ; words of the common always end in $i$, as khoi, a person. There are no cleviations from this simple rule.

Except for the names of living creatures which naturally take the termination required by their sex, there is no fixed rule to determine to which gender any given noun
shall belong. The names of things without life may be either in the masculine or in the feminine gender. The only -law which the Namaqua appears to follow in the imposition of gender upon things inanimate is that of euphony, and, in some cases, that which is imposed by a certain distant resemblance or analogy to the natural distinctions of the two sexes ;-a rule which we observe in English, when, by making the names of inanimate objects either masculine or feminine, we depart from the literal for the figurative style.

It appears from the classification of words which we have adopted, that the Namaqua language contains no article, but this deficiency is, to some extent, supplied in the following manner:-

The masculine or feminine termination serves to give every noun a definite sense, and the common to make it indefinite; the following examples will illustrate this provision :-

When the sex requires to be particularly shown, the words auri, male, and tarari, female, are often employed. Thus we have,-
auri-khoi, a male person; lurarikhoi, a female person. auri-choï, a male child; turari-choï, a female chill.

## Schorl of soles.

There are three Numbers, -the Singular, Dual, and Plural. The nominative masculine ending in $p$, changes $p$ into the in the dual, and lie or ka in the plural, as,hap, the horse; khalkha, two horses; kaki or kaka, horses.

The nominative feminine ending in $s$, changes $s$ into $r a$ in the dual, and $t i$ in the plural, as,-teqras, the woman; tarara, two women; tarali, women.

The nominative common ending in $i$, changes $i$ into $r a$ in the dual, and $n a$ in the pluaral, as,-gui, a sheep; gura, two sheep; grona, sheep.

Example of the masculine noun cleop, the boy; the feminine noun ckos, the grirl; and the common noun ckoï, a child.

| sing. | dual. | rlural. |
| :--- | :--- | :--- |
| ckop. | ckokha. | ckoku or ckhoka. |
| ckos. | ckora. | ckoti. |
| ckoi. | ckora. | ckona. |

From these rules there are neither deviations nor exceptions.

## C.ISES or nouss.

In enumerating the cases of Namaqua nouns, we shall only specify such a number as seem to be clearly indicated by the dificrence of termination. This will reduce the forms of nouns obtained by declension to three, viz., -the Nominative, Objective, and Vocative.

A masculine noun ending in $p$, is thus declined:-
sivg.
N. Qgap, the servant.
O. Resaba, the scriant. V. Qaxzi, $O$ serraut.

DUAL.
N. Qgakha, the lioo servants.
O. Qgakkn, the tioo sercunts.
V. Qgablio, oteco sercaits.

PLCRAL.
N. Qgaku or Qgaka, screants.
O. Qgaku or Qgaka, scriunts.
V. Qgako, 0 servunts.

A feminine noun ending in $s$ mes the following forms:

SING.
N. 'laras, lhe roman.
O. Tarasa, the reoman.
V. 'larasi, O qooman.

DUAL.
N. Tarara, the tieo women.
O. Tarara, the tico roomen.
V. Tararo, O lico seomen.

PLURAL.
N. 'luati, women.
O. Tarati, momen.
V. Iaraso, 0 коizen.

A noun of the common gender ending in $i$, -

SISG.
N. Cuii, a stonc.
O. Cuiba, a stone.
V. Cuizi, O stone.

DUAL.
N. Cuira, 1100 stoncs.
O. Cuira, tivo stoncs.
V. Cuiro, olico stones.

ILURAL.
N. Cuina, stones.
O. Cuina, stones.
V. Cuido, O stoncs.

In composition the nominative case often takes the objective form ending in $a$, for the sake of cuphony; thus for zughup ni ha, the night will come, we should say zughuba ni ha.

The possessive is formed by the particle di, which is placed immediately after the nominative form, as :-gataup di guman. The cattle of the chief.

But the particle is frequently dispensed with; thus we should say, gau-aup guman, which is equivalent to,- the chief's cattle

The dative is the same as the objective, as,-qgaba ma. Give it the servant.

When it is necessary to be more explicit the post position qua is employed to indicate the dative case, as,qgaba qua ma. Give it to the servant.

The ablative is formed in like manner by the aid of post positions, which may follow either the nominative or the objective cases, as:-

$$
\begin{array}{ll}
\text { omi qua, in a house. } & \text { amap ckha, zeith truth. } \\
\text { khoip gha, of the mann. } & \text { quatba vui, out of the light. } \\
\text { qasa gluu, from the place. } & \text { cous diba, at the fountain. }
\end{array}
$$

dinist tive nouss.
There arc two forms of diminutive nouns, the first is obtained by inserting the particle $r \cdot 0$, and the second by inserting the particle da between the root of the noun and the final letter, which marks the distinction of gender, thus:

$$
\begin{array}{ll}
\text { qums, a hand. } & \text { qumdas, a litlle hund. } \\
\text { zaup, a calf. } & \text { zâurop, a liltle calf. } \\
\text { qhumi, a mountain. } & \text { qhumdai, a littlc mounlain. }
\end{array}
$$

Example of the declension of a diminutive noun, agharop, the little lad.
stivg.
N. Agharop.
O. Agharoba.
V. Agharozi.

DUAL.
N. $\Lambda$ gharokha,
O. Agharokha.
V. Agharokho.
rLURAL.
N. Agharoku.
O. Agharoku.
V. Agharoko.

The diminutive particle rop is more used for persons and things having life, and dap for inamimate objects, though this rule is often reversed in order to promote the euphony of sentences.

Example of a diminutive noun in da, coudai, a little fomntain.
sing.
N. Coudai.
O. Coudai.
V. Coudaizi.

DU.if.
N. Coudaira.
O. Coudaira.
V. Coudairo.

## rLURAL.

N. Coudaina.
O. Coudaina.
V. Coudaido.

## 2. ADJFCTIVES.

The adjectives of the Namaqua Language resemble those of the English tongue in not being subject to any inflections of gender, number, or casc. Whether primitives or derivatives, they invariably preserve the same form.

## DERTRATION OF ADJECTIVES.

A large number are primitives, such as, quri, white; vıu, black; cku, near; qkâi, good; .leci, great; vkhari, small.

Many others are derived from nouns. These are formed by affixing the particles $g h a$, or $s a$, to the radical part of the substantive, thus from $x k a m s$, water; qnap, light; cais, fire; cnams, love; we obtain,-cckcomgha, watery, or abounding with water; quasa, light; caigha, hot or fiery; and cnamsa, lovely.

Some that are derived from the root of the verb take the same aflixes as those which may be traced to nouns, as, burugha, wonderful, from buru, to wonder, cnamgha. lovely, from cnam, to love.

The particitipial forms of verbs are likewise used in the sense of adjectives, as, daura-xkami, ruming water; nabara-qnaï, shining light; xora-caip, a dying fire. Also, zwa-zwara, beginning, from zwa-ziva, to begin; and xkaura, insipid, from xkau, to spoil. Sometimes nouns are used as adjectives, when placed before other nouns. In this ease the sign of the gender must be clided, as, hei-omi, a wood house; curi-qurip, a metal bowl; gham-qhamis, a lion hunt.

When adjectives are used in the sense of substantives, they take the terminational sign of gender, as, vkham" qua lara kuba, I speak to the young. Here the adjective vhham takes the letter $n$, which is the sign of the common gender, nominative case, plural.

## DHLUUTLVE ADJective.

The particle ro is joined to an adjective, in order to give it a diminutive signification, in the same way that it is affixed to nouns for a similar purpose; thus, from vou, qkai, chu, we have vnuro, a little black; qkairo, a little good; and ckuro, a little near.

## COMPARISOX OF ADJECTIVES

Adjectives do not admit of any inflections in order to express the comparative and superlative degrees. The only method in which degrees of comparison can be formed is by employing prepositions or adverbs, such ats I gha, of, and qkia ci, above. Although this provision exists, the genius of the Namaqua Language docs not aflord equal facilitics for the process of comparison as are found in many other languages.

The following examples will illustrate the manner in which the comparative and superlative degrees are expressed :-

1. Kci, great.'
C. Qkà ci kei, more great.
S. Wan gha kei, yreat of all.

Qkîi, good.
Qkà ci qkiii, morere goorl.
Was glan qkiii, gnond of all.

1. K゙ei omi, a large house.
C. Ne omike xua omi gha gha ei kei, this horse is more great thon llat housc.
S. Xina omi ke wan gha kei, that house is great of all.
P. Nezi ke ckamsa, to-duy is hot.
C. Xari ke qkit ci ckamsa ke $i$, yesterduy uces noore hot.
S. Sizi ke wau gha chamsa ke i , the thay lefore neas hot above all.

Comparisons are often denoted in a general way. litrst, by adverbs, as,-keisi, greatly, ama, truly, burughasi, wonderfully; qlihu, rich; keisi qlihu, very rich; lurughasi qkhu, wonderfully rich. Second, without any distinctive sign of degree, as,-Yohamip ke qkhu weip qleâsan qua, John is rich amongst his brethren, i.c.: the richest of all his brethren.

## NEMELAL ADJECTIVES.

The Namaqua language docs not provide facilities for a very extensive numeration. In fact, counting is a very difficult process for a Hottentot should it ever be carried above a hundred.

We insert the following lists of Cardinal, Ordinal, and Adverbial Numbers.

```
ckui, onc. quani, six.
ckam, lico.
gnoma, threr.
lak:, fuer.
kore, fice.
\[
\begin{aligned}
& \text { 〔nani, six. } \\
& \text { lhu, scecil. } \\
& \text { xкhaisi, cight. } \\
& \text { goisi, ninc. } \\
& \text { disi, ten. }
\end{aligned}
\]
```

'The combinations of tens, and also of tens and units, have to be expressed in the following way, -
ckann disi, quona disi, laka disi, disi disi, cham desi desi, quona disi disi, kei vgou disi, ckam kei vgrou disikha, quona kei ygou disili, disi ckui cklan,
turo tens.
three teins.
four tens.
" hundred.
troo hundred.
three hundred.
a (housand (or great vehole ten).
lico lhousand.
three thousand.
clecei, or ten rill oik.
cisi ckam ckha, chanı disi ckui ckha. ckam disi ckam chla, disi disi ckui ckha, disi disi ckamı disi ckui cklia, kore disi disi, quoua disi, haka ckha, five hundrod and thirty-four, or, literally, five ten tens, three ten rith four:

In counting cleven, twelve, \&ic., the word disi, ten, is often omitted, and then we say ckui ckha, ckam ckha, \&c.

There is only one numeral to express an ordinal adjective, viz., vkuro, first; all the rest are formed by adding the particle xef to the cardinal numbers, as, -

| ckam xûi, second. | quani x $\mathrm{ci}_{\text {, }}$ | sixth. |
| :---: | :---: | :---: |
| quona xc i , third. | disi | fonth. |
| haka xêi, fourlh. | cham disi $\mathrm{xc} \mathrm{c}_{\text {, }}$ | twentieth. |
| kore xêi, fifth. | chana disi ckui ckha meil, | locaty-firs |

Adverbial numbers are formed by employing the term quas, turn or time, which being a noun, observes the inflections of number, as,-

| ckui quas, | onc time or once.  <br> cham quara, theo times or trice. |
| :--- | :--- |
| quona gnadi, | tliree times or thrice. |
| disi quadi, | ten times. |

Multiplication may be carried on in the following mamer,ckam quara ckui ke ckam, tuice one, fe. ckian quara ckan ke laka, quoua quadi ckui ke quona, three times onc, fo. qnona quadi ckam ke quani, quona quadi qnona ke goisi, $\S$ c.

This is the simplest mode of which the language admits, but it will readily be conceived that if the whole multiplication table were worked out it would be exceedingly complex and puzzling to the unpracticed ear of a Namaqua, who has no idea of the elementary rules of arithmetic ; for
instance, twelve times twelve are one hundred and fortyfour, would stand thus,--disi ckam chha qnadi disi ckam cla ke disi disi $\approx i$ haka disi $\approx i$ haka ckha.*

## 3. PRONOLNS.

The pronouns of the Namaqua language admit of the simple and comprehensive classification adopted by many English Grammarians, viz. : Personal, Relative, and Adjective. The last will include Possessive, Interrogative, Demonstrative, and Indefinite Pronouns.

## PERSONAL PRONOLNS

These rescmble substantive nouns, in being subject to inflections of gender, number, and case. In the gender of the personal pronouns there are some nice distinctions, which, from their peculiarity in the structure of language, are both interesting and important to philological science. It will be seen, for example, that distinctions of gender are not, as in the dead and nearly all the known living languages, confined to the third person, but that they also extend over the first and second person in all the numbers, except the singular of the first person. There are likewise double forms of the first personal pronoun in the, dual and plural numbers, which serve to express both an exclusive and inclusive signification. This will be more fully explained below.

To illustrate the mamer in which personal pronouns are inflected, we subjoin the following formula, showing the terminations distinctive of gender, number, and case. This will not only prove serviceable in the declension of pronouns, but also in the conjugation of verbs, when it will be seen that the primitive part of the pronoun is often rejected and only the terminational signs of gender,

[^2]number, and case are retained, to show the governing person.

## FORMULA OF PERSONAL AFFIXES.

First person:-
Mas.
Sig. $\begin{cases}\text { Nom. } & \text { ta, } \\ \text { Obj. } & \text { tc, } \\ \text { Voc. } & \text { tai, }\end{cases}$
xis.
Dual. $\left\{\begin{array}{lc}\text { Nom. } & \text { khum, } \\ \text { Obj. } & \text { kbuma, } \\ \text { Voc. } & -\end{array}\right.$
Plur. $\begin{cases}\text { Nom. } & \text { kc, kum, } \\ \text { Obj. } & \text { kc, kuna, } \\ \text { Voc. } & -\end{cases}$
Second Person:-
mas.
Sing. $\begin{cases}\text { Nom. } & \text { z, } \\ O b j . & \text { zn, } \\ \text { Voc. } & \text { zit, }\end{cases}$
Dist. $\left\{\begin{array}{l}\text { low. } \\ \text { Obj. } \\ \text { Voc. }\end{array}\right\}$ kibo,
lur. $\left\{\begin{array}{l}\text { louis. } \\ \text { Obj. } \\ \text { roc. }\end{array}\right\}$ ko,
Third Person:-

Mus.
Sing. $\left\{\begin{array}{l}\text { Nom. } \\ \text { Oi. } \\ \text { floc. } \\ \text { ba, li, }\end{array}\right.$
Dual. $\left\{\begin{array}{l}\text { Nom. } \\ \text { Obj. }\end{array}\right\}$ klan,
Plus. $\left\{\begin{array}{l}\text { Nom. } \\ \text { Obj. }\end{array}\right\}$ ki or ka,

The feminine and common the
same as the masculine.
FEM.

$$
\mathrm{im}, \quad \text { rum, }
$$

$$
\mathrm{ima}_{1} \quad \text { rama, }
$$

| sc, | da, |
| :--- | :--- |
| sc, | da, |
| - | - |

fry.
s,
$\mathrm{sa}, \mathrm{si}$,
$\{\mathrm{ra}$
$\{\mathrm{di}, \quad\}$ n ni: na.

The personal pronouns are tita, I; sax, thou; x ap, he; xêis, she; and $x e ́ i$, it.

Titi is thus declined :-
mas.
Sing. $\left\{\begin{array}{l}\text { Nom. Rita, } I, \\ \text { Old. } \\ \text { Vita or } \mathrm{ti}, \text {, me, } \\ \text { Voc. titai, } O m,\end{array}\right\}$ same as the masculine.
mas.

PES.

$\left.\begin{array}{ll}\text { iasi, } \\ \text { sisi, } & \} w e \\ \text { sasi, } & \} u s \\ \text { nisi, }\end{array}\right\}$.
com.

$$
\left.\begin{array}{ll}
\left.\begin{array}{l}
\text { sadat, } \\
\text { sida, } \\
\text { sadat, } \\
\text { ida, }
\end{array}\right\} u \text { use. }
\end{array}\right\}
$$

Sakhum and salem may be termed inclusive, whilst sikhum and sikum may be denominated exclusive pronouns. The first two include any person or persons addressed, but the latter only embrace the persons speaking, and those spoken of.

Thus, one person speaking to another would say, sakhum ni ki, we will go ; ic., you and I will go.

But in speaking of himself and a third party, he would say, sikhum ni qkhí, we will go ; ie., he and I will go.

Swazi:-
mas.
Sing. $\begin{cases}\text { Nom. } & \text { say, thor. } \\ \text { Old. } & \text { saza, thee. } \\ \text { Hoc. } & \text { sari, } \\ \text { O thou. }\end{cases}$
Son. saklio, you two
Duet. : Obj. sakho, you tiro. Voc. sab ho, O you tiro. sara,
Plur. $\left\{\begin{array}{ll}\text { Nom. } & \text { sako, your. } \\ \text { obj. } & \text { shako, you. } \\ \text { Roc. } & \text { saki, } O \text { you. }\end{array}\right\}$ sass, $\begin{aligned} & \text { sadu, } \\ & \text { sadu, } \\ & \text { sade, }\end{aligned}$

## Xeip :-

Mas. PEM. Com.
Sivg. $\begin{cases}\text { Nom. } & \text { xeip, he. } \\ \text { Obj. } & \text { xeiba, him. }\end{cases}$
xeis, she. xei, it.
reisa, her. xei, it.
Dual. $\left\{\begin{array}{l}\text { Nom. } \\ \text { obj. }\end{array}\right\}$ seikha, $\quad\{$ xeira,$\quad\}$ scikba or ra,
Plur. $\left\{\begin{array}{l}\text { Nom. } . \\ \text { olj. } .\end{array}\right\}$ xeiku or xcika, $\{$ xeidi, $\}$ xcin, xcina.
The Possessive Cases of Pronouns are expressed in the same way as those of Substantives by the aid of postpositions, thus, Tita di, tita gha, of me; likewise the Dative and Ablative, as,-xeiba qua, to him; tita chha, with me; saz aghu, from thee, weis osi, without her.

Te-eizama, I myself; sa-eizama, thou thyself; and xei-eizama, he himself, are Compound Personal Pronouns. Except in the nominative case, which has no distinction of gender, they are declined as the examples above.

The nouns aup, man; taras, woman; and khoi, person, would be thus declined in conjunction with the first and second personal pronouns:-

MAS.
 Sisg. $\left\{\begin{array}{l}\text { Nom. } \\ \text { Obj. } \\ \text { Voc. }\end{array}\right\} \begin{array}{l}\text { sa auz, thou man. }\end{array}$ sa auzi, o thou man. sa tarasi, $\left.\begin{array}{l}\text { sa tarasa, }\end{array}\right\} \begin{aligned} & \text { sa khoiza, } \\ & \text { sa kizi. }\end{aligned}$

In this mode of declining a noun and pronoun conjointly, the radical part of the substantive is inserted between the root of the pronoun and the various inflections.

The Dual and Plural numbers do not admit of any alteration either of the Noun or Pronoun; thus we should say, sakum-aukum, we men; sase-tarase, we women ; sadukhoidu, ye people.

Ti ckuila, I alone; saz-ckuiza, thou alone; xeipckuiba, he alone; te xkhata, I the same, and the like, follow the example just given.
'I' o these may be added :-

RELATIVE PRONOLSS.
In this class of Pronouns the Namaqua Language is very deficient. 'The only example corresponding to the Relatives of the English tongue is found in the word hia, that.

Hia, which is undeclined, may relate to antecedents of any Gender, Number, or Case, for example :-
khoip hía xari ke ha, taras híu ra xnai, dumi tía ra kuba,
gllun hîa ke maï,

The man tho arriced yesterday.
The voman who sings.
The voice athich speaks.
The things that were given.

But although hian is undeclined in its relation to the antecedent, it takes the personal affixes which distinguish the gender of the noun governing the following verb, as -

| Khoip hinta xari ke mu, | The man whomi I suno yesterclay. |
| :---: | :---: |
| taras lianz ke rkei, | The tooman thom your catled. |
| dumi han ke xnau, | The woice that they heard. |

The Relative Pronoun is, however, frequently dispensed with, and the sense expressed by transposing the members of the sentence. The verb is put before the noun it governs. According to this method the examples above given would stand thus:-

$$
\begin{array}{ll}
\text { xari ke la khoip. } & \text { xari ta ke mu khoiï. } \\
\text { xnaira taras. } & \text { Vkciz ke taras. } \\
\text { kubara dumi. } & \text { xnaun ke dumi. }
\end{array}
$$

This may be further illustrated by the following translations of Luke vii. 10: "And they that were sent, returning to the house, found the servant whole that had been sick":-
"Ziku xcin hia omichaku ke sihe xlinaba sio, on ke qgaba hia caisin ke hâi vgousi ke ho.

Ziku ke sîhe-keka omichaku ke xkhaba sio, caisin ke hai qgaba vgousi ke ho.

These two methods appear to be used according to the taste and style of the speaker. The former, however, is more general. The latter may contribute to the conciseness, but not to the perspicuity of sentences. Knüdsen invariably adopts it in his translation of St. Luke's Grospel, whether from its being more in use among the tribes with whom he resided, or from having followed analogies furnished by other languages, I cannot say. In the passage above quoted he has evidently assimilated the translation to the German text as closely as the idiom of the Namaqua would-allow.

Pronouns termed in English Compound Relatives are, in the Namaqua, derived from Interrogatives, and will, therefore, fall more properly under that division.

## ADJECTITE PRONOLXS.

In this class we have comprehended Possessive, Interrogative, Demonstrative, and Indefinite Pronouns. Those termed Distributives, as, each, every, cither, neither, have no corresponding words in the Hottentot dialects.

Possessive Pronouns ;-
These are derived from the Personals, and, in some instances, exactly correspond with them. The following list includes all of them:-

| Pli or lidi, | 9.4. |
| :---: | :---: |
| sa or sadi, | they. |
| Sng. $\{$ xêip or xêpdi, | his. |
| xêis or xêisuli, | heres. |
| (xîi or xôidi, | its. |

Dual. $\left\{\begin{array}{l}\text { sakhum or sakhumdi, } \\ \text { sikhum, \&re. or siklumdi, } \\ \text { sarum or samdi, }\end{array}\right\}$ our.
Plur.

And so forth through all the inflections of Number and Gender. There is another form of possessive pronoun expressed by the particle $a$. To this the various terminations which stand as signs of the Genders and Numbers may be affixed, and thereby all the possessive pronouns will be represented in a convenient and comprehensive manner. The first form of possessive pronouns is derived from the roots of the personal pronouns, and the latter from the inflections.

Examples of nouns and possessive pronouns, gkip, brother, qlicks, sister, and lihni, friend.

| Sing. | to gkis. | te gkis | te khoi |
| :---: | :---: | :---: | :---: |
|  | Sakhum quichia | sasi qkirra | sarum Khoikha |
| Dual. | $\{$ sikhum qkakha | sisi quara | sirum khoikha |
|  | \{ sakum qkâkz | sadi q̧kâdi | sada khoin |
| Plur. | [sikum) qkika | sidi q̧kâdi | sida khoin |
| Or, |  |  |  |
| Sing. | qkâp ùta | qkâs ¢̂ta | khoi ita |
| Dual. | qkâkha âkhum | qkîra âsi | khoikha irum |
| Plur. | qkîka âkum | qkeâdi îdi | khoin idit |
| Sing. | sa q̧kîp | sa qkî̀s | sa khoi |
| Dual. | sakha qkîkha | saro qkara | saro khoiklia |
| Plur. | saku qkaka | saso qkadi | sadu khoin |
| Or,- |  |  |  |
| Sing. | qkâp izz | qkis is | khoi : ii |
| Duat. | qkikha âkhu | qkâra âro | khoikha áro |
| Plur. | q̧kîka âku | qkâdi aso | khoin addu |
| Sug. | xêip qkaip | xêis qkais | xéi khoi |
| Dual. | xėikha qkeikha | xutira qkâua | xikla khoikha |
| Plur. | sêiku qkika | xêide rgkadi | x cein khoin |
| Or, - |  |  |  |
|  | qkip îp | qkâs its | khoi it |
|  | qkiikba úkha | qlaîra îra | khoikha âkha |
|  | qlaîka iku | qkîdi âdi | khoin in |

According to the first form the pronoun stands before the noun, but in the latter the substantive takes the precedence, thus,-

Te omi, my house, and sa qhanap, thy garden, are changed into omi ata and qhanap az.

Saku tani cuami qna, saku cumadi whâ, "In your. patience possess ye your souls," may be rendered by 'limi cnami âku qua, cumdi âku uhà.

Interrogative Pronouns:-
Hami ? who? mai? which? and tari ? what?

From these are formed hamitap-wap, whoever; maii-suai, whichever ; and tari-wai, whatever. The two former admit of inflection of gender, as, -

Mas. hamitap-wap. Fem. hamitas-was. Com. hami-tai-wai.

Demonstrative Pronouns :-
Ne this; with nou and sna that, are thus declined.

|  | Mas. | FEM. | com. |
| :---: | :---: | :---: | :---: |
| SiNg. | ( N. nep | nes | ncií |
|  | $\{0$. neba | nesa | neï |
|  | (V. nezi | nesi | nezi |
| Duat. | $\{N$. nekla | nera | nekias |
|  | $\{V$. nckio | nero | nckho |
| 1'lut. | $\{$ N. neka | ncdi | nen nema |
|  | (V. ucko | nedo neso | nedo |

Noup, nous, nouil, the same as nep.
Sing.

| ( $N$. xnap | xuas | xnaï |
| :---: | :---: | :---: |
| O. xnaba | xnasa | xıaï |
| ( $V$. xunzi | xnasi | xnazi |
| \{ N. xnakha | xnara | xuaklıa |
| \{ /F. smakho | xuaro | xnalio |
| S N. maka | xuadi | xman |
| \{ $V$. xuako | xuado-xuaso | xnako, or madu |

The Demonstrative Pronouns are only declined when hey stand singly without any noun expressed.

## Indefinite Pronouns:-

Such as cni, some ; cni ckui, or cni kumaï, any ; ckiui, one; cnï̈, other; chhara, another; ghari, none; wan, or wazoma, all ; wakha, both ; snadi, such.

These, like the Demonstrative Pronouns, when standing in conjunction with a noun expressed, are undeclincd,
but otherwise admit of the following inflections of gender:-

| cnip, | cnis, | cniï, |
| :--- | :--- | :--- |
| cni-ckuip, | cni-ckuis, | cni ckuii, |
| ckuip, | ckuis, | ckuii, |
| chbarap, | ckharas, | ckharaï, |
| gharip, | gharis, | gharii, |
| wakha, | wara, | wakha, |
| xnadip, | xnadis, | xuadiï. |

Cnii, wan, and wazoma, are exceptions which have no variations.

## 4. VEIUSS.

In treating of Namaqua Verbs we have to notice their Derivation,-Forms, Voices, Moods, 'Tenses, Numbers, Persons, and Conjugation.

THEIR DERISATION.
'The roots of verbs in the Namagua Language are found in the second person singular of the Imperative Mood, as:-cnem, love ; mu, see ; qkii, go.

A large class of Verbs consists of primitives. All monosyllabic verbs are of this kind, some of more than one syllable are also included, as, cari, to sprinkle ; qhami, to hunt ; cyuri, to pray.

Some are obtained by a recluplication of the radical part of primitive verbs, thus from van, know, is formed van-van, to inform ; from véi, think, vcí-veí, to remember; from kon, move, kon-kon, to disturb.

Others are compounded of two or more different verhs, as, from khait, to rise, and from vmu, sit, is cerived, khaii$r m u$, to sit up, from $q k u$, to go, and ma, to stand, is formed qkii-ma, to walk about.

Many are formed by combining a preposition with the root of a primitive verb, thus, from $k a$, come, and vam,
upon, we have ha-vam, to happen; from veci, call, and vui, out, is formed vkei-vui, to challenge ; from ma, stand, and qua, against, ma-qua, to oppose or resist; from $c u$, to be ignorant of, and $b a$, for, is formed cuba, to forgive.

A few are obtained from nouns by affixing $r i$ to the radical part, as, from gui, a sheep, is formed guri, to herd; from ckit, grass, ckairi, to graze; from caip, fire-wood, is formed cairi, to fetch wood. $A$ may also be added to the root of a substantive to construct a verb, as from xkams, water, we obtain xkama, to give water, or irrigare.

The reduplication of substantive roots also serves for the formation of verbs, as from quap, light, is formed qua-qua, to illumine, and from $q$ khup, a lord, qkhu-qkhu, to emich.

A large number of verbs are also obtained by the reduplication of adjectives, as quri-quri, to whiten, from quri, white; qkaii-qhäi, to appease, from qkaii, good; vou-vou, to tame, from vou, tame; kei-kei, to honor, from kei, great ; ckabi-ckabi, to elevate, from ckabi, high ; qgam-qgam, to deepen, from qgam, deep.

## forms of thabs.

Namacqua Verbs assume various forms by which their signification is extended irrespective of the regular inflections of Mood, Tense, Number, and Person. The particle indicating an alteration or extension in the sense of the, verb is inserted between its root, and the different signs used in conjugation.

The following forms are found in connection with Namaqua Verbs:-The Primitive, Relative, Reflective, Causative, Reciprocal, Diminutive, Negative, Potential, and Optative.

The Primitice form exhibits the verls in its radical state, and forms the basis upon which the rest are constructed.

The Relative is formed by adding bra to the primitive, as
snâuba, to hear for, from anáu, to bear, mula, to see for, from mu, to sce.
$B a$, is equivalent in sense to the preposition for, and hence this form indicates that the action denoted by the verb, has a relative purpose.

The Reflective adds sin to the primitive form. In this form the action is reflected upon the actor; thus

> xniusin, to hear onesclf, from ruan
> musin, to sce onesclf, from tine
> cnamsin, to love oneself, from cnant

The Causative aflixes kei to the primitive form: kei signifies to cause, and shews that the action of the verb is necessitated, as

> mokei, to cause to sce
> snaukei, to cause to hear
> cnamkei, to cause to love

The Reciprocal is derived from the primitive by adding $k u$, and denotes that the action is performed by two or more mutual actors, thus
snaukill, to hear oue another muku, to sec one another cnamhit, to love one another.

The Diminutive is derived from the primitive by adding the particle ro to it, as
xnauro, to hear a little
muro, to see a little cnamro, to love a little.

The Negative form is derived from the primitive by adding dama to it, thus
xnâudania, not to hear
mulama, not to see
cnamdame, not to lovc.

The Potential is formed from the primitive by affixing to it xkha, to be able. This form stands instead of a Potential Mood. It ranks more properly as a form than as a mood, since it corresponds with the other forms in standing before and not after the pronominal affixes, thus,
xuitualkhe, to be able to liear muxtila, to be able to see cuamhiha, to be able to love.

The Optative form adds wau, to wish, to the primitive. It may be considered a form for the same reasons as the Potential, thus

> xnâuvian, to wish to hear
> muvka, to wish to see
> cuamokau, to wish to love.

From the above simple Derivative forms, some compound forms may be obtained.

The Relative and Reflective are often combined, thus,
xuâubasin, to hear for oneself mubasin, to sce for oneself cnambasin to love for oncself.

To these may also be joined the Potential and Optative, thus,
muxkhabasin, to be able to see for oneself xntuuvkaubasin, to be able to hear for oneself.

To the above the Negative may be affixed, as
xnitubasin, not to hear for oncself xuaturkaubasindama, not to wish to hear for oneself.

The Reciprocal and the Negative, and the Reciprocal and the Optative, may also be combined, as
xnâukudama, not to hear one another
snatukuka, to wish to hear one another.

It will be shewn below to what extent these forms run through the various moods and tenses in conjugation.

## voices of terbs.

The Primitive forms of Verbs have two voices, the active and the passive. The passive voice is formed by addling he to the radical part of the active, as

$$
\begin{aligned}
& \text { xanulk; to be heard, from xuiu } \\
& \text { multe, to be seen, "mu } \\
& \text { cnamhe; to be lored, „, cuam }
\end{aligned}
$$

The Causative, Diminutive, and Negative forms are also found in the passive voice, thus,

$$
\begin{array}{ll}
\text { xnaukeihê, } & \text { to cause to be heard } \\
\text { murohê, } & \text { to be secn a little } \\
\text { cuambédama, } & \text { not to be loved. }
\end{array}
$$

The remaining forms are generally confined to the active voice, though there is nothing in the genius of the Namarqua Language to provent their being conjugated passively should the sense of discourse require it.
3000.s.

There are four moods, the Infinitive, Imperative, Indicative, and Subjunctive. The definitions generally given of these moods in English Grammars will fully explain their nature in Namaqua Grammar.

The Infinitive is used to express a thing in a genemal mamer.* It contains the Present, Perfect, and Future 'Tenses.

The Imperative commands, exhorts, entreats, or permits.
The Indicative simply declares a thing.
The Subjunctive represents a thing under a condition, supposition, motive, or wish.

* Tie particle se is often required to assist in its formation.

TENSES.
The 'Tenses of a Namaqua Verb are the Present, Past, Perfect, Pluperfect, Future, and Future Perfect.

The Present Tense represents an action in a state of progress. It may also be used as in English and other languages in a general sense, without allusion to any particular time.

The Past 'Tense represents an action either as completed or in a state of progress, at some time past.
'Ihe Perfect Tense represents an action as completed at the present time.

The Pluperfect Tense represents an action as completed previous to some other past event.

The Future Tense represents an action as yet to come.
The Future Porfect represents an action as about to take place subsequent to some previous event or action.

The 'lenses are formed by the help of the Substantive Verb.
'Ihe 'Tenses of the Substantive Verb are as follows:-

| 1'mis. | r, ke, ke-n, ra, |
| :---: | :---: |
| l'ast | ke, keke, |
| Pemf. | ko, |
| ]'luft. | kc, ko, |
| Fut. | ni, keni, |
| Fut. leer | nihit, ke-mi-hat |

A, ke, ke-a of the Present; keke of the Past; keni of the Future, and lee-ni-hat of the Future Perfect, are forms not used in the conjugation of 'lenses but in the construction of sentences, and when the substantive verb is employed separately.

## ntyber

Verbs have three numbers, the Singular, the Dual, and the Plural. 'The number is not distinguished by any
inflection of the root of this verb, but by the governing noun or pronoun. In the case of pronouns governing, the number is indicated by remmants of the personal pronouns I which are usually inserted between the verbal root, and the particles of the substantive verb, thus,

$$
\begin{array}{ll}
\text { mulara, } & \text { I sec } \\
\text { mukiumra, } & \text { we sce. }
\end{array}
$$

pilisols.
There are three persons in the Conjugation of a Namaqua Verb. These, like the numbers, are only distinguished by the substantive or the governing pronoun, the radical part not being subject to any variation.
conjig.ition.
Under this head examples will be given of the mamer in which verbs pass through the Forms, Voices, Moods, 'lenses, Numbers, and Persons.

Conjugation of the verb hd, to be.
infinitive.
Pres. hit, to le
Perif. hâko, to have becn
livi. Lâni -
PARTICIPLES.
Pres. hurra, being
Perr. hitrako, having becn
Fet. hauira,
mperative mood.
Present inense.
Sing.
1 Yers. ìta hâ, let rike bc
2 hit, be thout
3 ip hat, let him le
is hii, let her le
ii hia, let it be.

|  | Duale |
| :---: | :---: |
| ikum |  |
| $\operatorname{imm}_{\text {imum }}$ | flâ, let us troobc |
| 2 lâklo hiuro | \} beye treo |
| 3 ikha |  |
| fra | \} liai, tce thsiat teo be |

## 4

Pheral.
$\left.\begin{array}{c}1 \begin{array}{l}\text { ikum } \\ \text { isc } \\ \text { ílas }\end{array} \\ j\end{array}\right\}$ hin, lel us be
$\left.\begin{array}{c}2 \text { hâko } \\ \text { hâse } \\ \text { hâlu }\end{array}\right\}$ be yc
$\left.\begin{array}{c}3 \text { ikn } \\ \text { îli } \\ \text { int }\end{array}\right\}$ hâ, lec theciil he
indicative mood.
Present Tonse.

| Sing. |  |
| :---: | :---: |
| 1 hataza | $1{ }^{\text {a }}$ / |
| 2 hatza | thou $\mathrm{ci}^{\prime}$ |
| hâsa | thoul |
| 3 hîpa | he is |
| hatsa | she is |
| hatiot | it is |

Dusi.

Pluial.

$\left.\begin{array}{c}2 \text { hako-a } \\ \text { hâso-a } \\ \text { hâla-a }\end{array}\right\}$ ye are

Past hâtake, I qous,
Perf. hatako, I have lecn, l'uur. hàtakeko, I had becn,
Fut. hâtani, I shall or toill be
Fut. Perip. hitataihâ, I shall or will hate bech. $r$

## SUBJUNCTIVE, MOOD.

presext haitaka, IfIbe
Past hiatakeka If $I$ : cere
lerrs. hatakoka If I hate becia
Piur. bittakekahat If I hued been
Fut. hâtanikî IfI shall be
Fut. Perr. hatanikabat If I shull hure been.
$i$ and $o$ are also signs of the subjunctive mood used in conjunction with ka, thus hâtakai, or hatakao, if 1 be.

The Present Tense is the model upon which all the remaining Tenses in the Indicative and Subjunctive Moods are conjugated.
$i$, to be, is conjugated in the same manner as ha, and with its assistance, thus,
Pres. itahat, Iam Plupr. itakeko, I had becas
P.st itake, Ifeas Fiut. itaui, I shall be

Perf. itako, I hure been Fur. Pt. Âtanihâ, I shull huze been

Conjugation of the Verb cnam, to love. active yoics. infinitive mood.
Pres. cuam, to lore Perr. cnanko, to have loced Fut. cuamui, PARTICIPLES.

Pres. cnamra, loving
Perf. cuamrahti, luciuy loced Fur. cnamnira,
himerative mood.
Present Tchse.

Sing.
1 ita cham, let ane lore
2 cuann, lore thore
3 ip cuan, let hiint lore is cnam, let her loce: is cram, let it lore

Deal.

| 1 ikhum im iruu | $\} \text { cham, let us lore }$ |
| :---: | :---: |
| 2 coamkio chamro | \} love ye |
| 3 iklia ira | $\} \text { enam, let thent }$ |

Pierain.

iNDICATIVE MOOD.
l'esent T'crise.

Trinsitive Form.
Sing.

Duar.

|  |  |
| :---: | :---: |
|  |  |
|  |  |
|  |  |

Plur.
1 cnamkera cuamsera cnamdara
2 chamkora cuamsora cnamdura
3 cnamkura $\left.\begin{array}{l}\text { chamdira } \\ \text { cuamnra }\end{array}\right\}$ they love

Ixprassitive lorm.
Sive.

| cmantaha, | $I \mathrm{~cm}$ locing |
| :---: | :---: |
| 2 cuamzlâ, cnamshâ | Thou a |
| 3 cuamphat | He |
| shà | She is locing |
| chamilia | $n t$ is toving |

Duat.

Plur.
$\left.\begin{array}{r}1 \text { coamkehâ } \\ \text { cuamschâ } \\ \text { cuamdahaí }\end{array}\right\}$ re are loring
$\left.\begin{array}{r}\text { cuamkohà } \\ \text { cnamsohâ } \\ \text { cuamduhâ }\end{array}\right\}$ ye are loring
$\left.\begin{array}{l}\text { cnamkuhâ } \\ \text { cnamdihâ } \\ \text { cnamuhà }\end{array}\right\}$ they are loving

The pronouns and particles may be placed before the root, thus,
tara cnam, zry cuam, Thassitive.
Past cuamtake
Perf. cnamtako
Pluperp. cnamtakcko
Fur. cuamtani
Fur. l'err. cnamtaniha.
The above Tenses of the Indicative Mood, are all conjugated in the same manner as the Present.

SUBJUNCTIVF, MOOD. -
Signs ka, kai, kilo.
Present Tense.
Trasitive Form.
Sing.

| cuamtaka | If I love | 1 cramtakahâ | ing |
| :---: | :---: | :---: | :---: |
| 2 cnamzka cluamska | thou lovest | 2 cnamzkabat cuamskahâ | $\int$ |
| 3 cm |  | 3 cuam |  |
| cuamska | love | amskah | $g$ |
| coamika | If it loce. | cnamikahâ | If it be loving. |

The Dual and Plural Numbers are conjugated as in the Indicative Mood.

| Past. | cnamtakckit |
| :--- | :--- |
| Perf. | cnamtakokâ |
| Plupemp. | çamtakckokâ |
| Fut. | cnamtanikâ |
| Fot. Perf. | cnamtanikahâ |

The Relative, Reflective, and other forms of Verbs, are conjugated in the same manner as the Primitive; thus, cnamba, to love for, forms in the Present Tense,-

Sing.
1 cuambatara $I$ lorc for
2 cnambazra
cuambasra $\}$ Thou Lorest for
3 cnambapra Me loves for
cuambasra She loves for
coambaira It loves for.

In the Reciprocal form the conjugation is necessarily confined to the Dual and Plural Numbers.

The Negative form is irregular in some of its Tenses.
The infinitive Mood with the Present, Past, Perfect, Pluperfect, and Future Perfect of the Indicative and Subjunctive Moods, are conjugated regularly. The exceptions are as follow:-

The Imperative Mood forms its negative by prefixing $t a$ to the first and third person, and titi to the second person, as

> in îta cuam, let na not love ta ip cuan, let him not lore enamztiti, thou shath not love.

The liuture Tense forms its negative by substituting liti for $n i$ and dama, as

> cnamatatiti, I vill not love
> cuamztiti, Thour shalt not lore
> cuamptili, IIc ooill not lovc.

The Future Perfect also admits of being expressed in a similar manner, as

> cnambâtatiti, I ucill not have loved.

When the object upon which the action of a verb terminates is represented by a substantive, then it may be placed either before or after the verb by which it is governed, as

> Eloba tara cnam, I love Cod Cnamtara Eloba, " ",

But when it is.represented by a pronoun, the inflected part of the pronoun is joined to the root of the verb, so as to stand before the nominative pronoun, thus,

| $\left.\begin{array}{l}\text { enamzitara } \\ \text { cnamsitara }\end{array}\right\}$ | I love thee <br> cnambitara |
| :--- | :--- |
| I love him. <br> cnamsitara <br> cuamitara | I loce her. <br> I love it. |

## plasive: Morer.

Sigi hé.
INEINITIVE MOOD.
lizes. chambê
Prar. cnamhêko
Fut. cnambêni.
PARTICIPLES.
Pres. cnamhèra
Perr. cnamhêralsit
F̌it. cnamhênirahâ.
TMPERATIVE MOOD.
ida cnamhé, let me be looc
cnamhing, Le thou loved
it cuamlet, let him bc loced.
and so forth as in the Active Voice.
INDICATIVE MOOD.
Pirscht Tense. Sug.
1 cnamhêtahâ I an loved
2 cnamliĉahat $\left.\begin{array}{r}\text { cnamhêshat }\end{array}\right\}$ Thon art loced
3 enamhêphat ITe is lover
chamlêshat She is loved
cnamhê̈lha It is loced.
The Dual and Plural Numbers are the same as in the Active Voice, hé being inserted between the theme and its inflections.

| Past Tense | cmambettake | I ras loved |
| :---: | :---: | :---: |
| Perfect | cnambêtako | I hare been laved |
| Pluperf. | cuambiêtakeko | I had becu |
| Futura | cnamhêtani | $I$ shall le |
| Future | crambétaniha | I shall liure brent 10 |

SUBJUNCTIVE MOOD.
Pres. Tease cnamhétaka If l be loved. And so forth through the remaiuing tenses.

## MPERSONM, VERHS

Impersonal Verbs correspond with the third person singular of the various tenses, as,-cabiura, it rains, cabïnira, it will rain, \&e.

The remaining parts of specel comprehending Adverbs, Prepositions, Conjunctions, and Interjections, being undeclined, it will suffice to append lists of those most commonly in use.

## 5. ADCBRBS.

Adverbs of mamer, which constitute a large class in the Namaguat Language, are chiefly derived from Adjectives. They are formed by aflixing the particle si to the root of the Adjective as, ama, true, amasi, truly; row, slow, vousi, slowly; qkai, good, qkâisi, well.

## SPECIMENS OF TR.LNSLATLION.

## Lekein. 1.

1. Zîp ke disi-ckam-ca qgaku âba ke vkei-chû, そî wa

Zip. And he. The pronominal remmant joined to the conjunction. The same arrangement would be observed if cither the noun or the pronoun were expressed in full. In that case they would be in apposition with $p$, and would be put in the oibj. case after the substantive verb : thus,-" Kip ke Jesiha," se., or, "Zip ke xëba," \&c. If the sentence were in the sul,junctive mood, the substantive verb would be omitted, and the nominative pronoun affixed to the possessive, thus, -" $Z i$ disi-ckam-ca qyaku äbap ke viei-chuio," \&c. The subject in an affirmative sentence is placed as near the begiming as possible. Nouns placed in apposition take the obj. case.
ke. The past tense of the substantive verb, used here as a temporary predicate. When te is employed in this way, the verb to which it refers is put near the end of the sentence, as,—Qkihup le Mosip qua tee mi. "The Lord said to M.oses." Kuüdsen places $p$ and tie in the second member of the sentence. 'This does not accord with the usage of the Namatua linguage, which seems to require that the sulject and predicate should stand promincutly forth.
disi-ckam-ca. laelve. A numeral adjective undeclined. Adjectives are gencrally placed immediately before the nouns they qualify, as ;-qkiku kihoip, a rich man; qum heis, a green tree. qgaku, servants or disciples. A noun, mas. gen. plur. obj., governed by the verb rkei-chu.
âba, his. Poss. pron. abbreviated terminational form,-see page 32. Oljj. case agreeing with ggalu. Another form would be xeit disi-ckam-ca gyak", in which the pronoun appears in full. Or a preposition, di, of, might be introduced, as,xitip di disi, \&c. The mode adopted in the text is, however, the most elegant and concise.
xkâuaku vama gaus zi cgciba ke maku, zi caisinhân Chi rgou-rgouse.
2. Zìp ke ke sî-vuiku, Elob gau-qhuba ku ni au ma, zî caisinhâna vgou-vgrou-ka.
ke vkei-chû, called logether. ke, sign of the past tense, vkei-chit a compouid verb, from rkei, to call, and chii, together. Active roice. Indic. Past. Sing. 3rd person governed by the pronominal remnant $p$.
zî, and, copulative conjunction. ITere a repetition of the pronown is not required.
wa, all, alj. pron. Standing in conjunction with a nown, and therefore undeclined. See page 33.
xkîuaku, devils, n. mas. pl. nom.
vama, over, prep., governs the nominative case. All prepositions are placed immediately after the nouns or pronouns to which they relate, as ;-quami ei, upon a momutain ; yusa-ylu, from the place.
gaus, authority, n. fem. sing. non.
zî cgeiba, and poter, n. mas. sing. obj. When two nowns arc joined by a conjunction and followed ly a verb, the first is put in the nominative and the latter in the oljective case.
ke ma, gave. Yerb. Active. Indic. Past, sing. 3rd pers.
ku, theni. third pers. pron. affix. plur. mas. obj. Sce page 26. Lin is the form employed as a dative. Being the object upon which the action of the verl) terminates, it is affixed to the root of the rerlb. See page 45.
zì caisinhân, and them that are sick. noun plur. com. gen. obj. governed ly vgou-ryou.
inni. that they. $\hat{n}$ is equivalent to the conj. that; $n$ is the pronominal remmant 3 rd pers. com. gen. plur. nom.
vgou-vgou se. might heal. ugou-vgou formed from ryou, whole, prefect. Act. subj. fut. plur. 3 pers. Ni is the sign of the future, there being no pronominal affx, it is placed before the verl.
Zìp ke ke si-vuiku. And he did seind out them. $P$ the pronominal

3．Zîp ke xêiku qua ke mi，Ta ghuil daup ei qkîtu，heií kai，kô̂ï kai，berii kai，mariï kai；zì ckuií âku ghariï ckam ana－vam－grkukha ni uhâ．
aflix，is the nominative to the whole verse．Te the temporary predicate is often followed by the verb itself．Si－vui，a com－ pound verl），from si to senel，and rui，out．Act．Indic．past． 3 pers．
Elop．Good．n．sing．nom．mas．A forcign word formed from the Hebrew．Introduced to supersede the tern Zui－xwap，literally sore knee，by which the Namaqua God，＂Ifeilje ELip，＂was designated．
gan－qhuba．Kimglom．n．sing．mas．obj．The possessive case is generally expressed in this way，by placing two nouns in conjunction，the possessor being put before the thing possessed． The former must be in the nom．case，the latter may be eilher nom．or olij．When the possessor is represented by a pro－ nominal affix，the order is reversed，as ；－qgatu tiba，his ser－ vants，as in the previous verse．
kit，they．pers．pron．affix，plur．nominative to the verbs an－xima and ryou－rgou．
ni au－xna，shall preach．$n i$ is the sign of the future tense．an ：rna compounded of an to throw，and ：xal，off，hence to throw of or preach．
7ì caisinhâna，and them that are sick，or，taken as a participial noun， the sich，the participle caisinhtu，being sick，is changed into a noun by adding the personal affixes，as caisinhiip，caisiuhtis， caisinhtui．
Thus caisinhaina is the plur．com．gen．obj．governed by ryou－rgor． vgou－vgou－kia，that they might heal．lia sign of the subj．mood． When two verbs in the future subjunctive，occur in the same sentence，the sign of the future tense is prefixed to the former，and that of the subjunctive mood to the latter．
hip ke，and he did．
Xeiku them．3rd pers．pron．mas．plur．obj．governed by yun， ¢⿴囗十，lo，governs an olj．case．
> 4. Zî̀ tari omi wai qua ku ka vkîi, xnaba hâ, ê xaba ghu ${ }_{\text {4tû-vua. }}$
6. Zi qkho-quaku dama kaina, ku keni ma qasa ghu
ke mi. saill, verb. act. transitive form, Indic. past tense, sing. 3 rel pers. governed by $p$. in zîp.
Th, do not, sign of the imperative mond, forbids, or entreats, and always stand at the beginming of a sentence; -as Ta xundi di, do not do so ; Tla ida ckiama musi, do not let me see you a second time.
ghuï, a thing. n. com. gen. hence indefinite.
daup ei, on the road. ei, a prep. groverns the nom.
qkî-u. lake along. formed from qliki to go, and $u$, to take, Imperative mood. pres. plur. 2nd pers.
heii kail. ochether staff: kai from kee whether or if, with the personal affix $i$ to agree with heiï. When used in this way it always t:ikes the personal affixes, as
kihoip kap, kihois kus, khoï̈ kui, whether man, or womam, or child.
kuiii kai, beriì kai, or kinife, or bread, \&c.
zî ckuï îkn, and one of your. ckui, numeral adj. undec. thku, possessive pron. aßix. sce page 32.
gharii, none. adj. indefinite pron. When combined with chimi it signifites not onc. It is very emphatic. The personal aflix of the com. gen. is attached to it here to be the nom. to the verb uhat. When a noun or pronoun is expressed it must be placed between the numeral and the indefinite adjective, as: cimi koï ylariï not one ptrson; chewi äke ghariii, not one of us.
ckan ana-vam-ghukha, heo coats, or literally chings to be worn over, a compound noun formed from ana to wear, vain over, and yhui a thing.
ni uhâ, shall have, verb active, intransitive form lmp. fut. plu. 2nd pers.
2î tari, and vokat.
gkû-vua, ̌î xkhadi veika âku ghu zamba ghaihi-xna, qkho-qkitai qua xèin rama.
omi wai, house soever. tari-cati, whichever, forms one word, both members loeiug deelined; the noun to which it relates heing expressed, requires to be placed in an intermediate position.
qua, into. prep.
ku ka rkî, ye may enter. pres. suhj. plur. 2nd pers.
suaba hâ, there remain. renabre is an adverb undec. Adverbs as well as aljectives gencrally stand before the verbs iley qualify. hí, imp. mood.
è xuaba glut qkithea, and therefrom.go out. ghen prep. goverus the obj. qiki-via, a verb from qhí, to go and vua, out, agrees with hii.
Cì̀ qkho-guaku dama kimina. And receive you not that they. qikhoqua. formed from qkio, to catch, and qua, to, verb. negative torm. Kill you, pers. affix of 2 nd pers. pron. plur. num. obj. groverned by qtiko-qua. kail sign of the sulbj. na. 3rd pers. pron. atlix. plur. com. gen. nom.
kil keni, you slall. kie substantive verb, used with ni, as temporary predicate.
xina, leat. demonstrative pron. undec.
quasi, place, n. sing. fem. oly.
ghu, from or out of prep. governing qusce.
qkit-vua, go out. Active transitive. Imperative mood. fut. phur. num. 2nd person.
\%î xhadi, and also.
reikil, feet, n. plu. mas. obj.
tiku ghm, your from, aiku possess. pron, aflin. agreeing with veika in number, gender, and case.
zarilai, dust, n. sing. mas. olj. governed ly the following velb.
qhaibi-xna, shute off; verb. act. trans. form.
ykho-qkasa. a testiziony, n. compounded of qkiko to catch, and qrin, back, Jiterally to catch belhind, so to take up, or witness. sing. fim. obj.
qua, lo or for; prep. governing qitho-qhiusu.
xêin vama, then "pous. rama governs thein in the nominative.
6. Zî ku ke vua, zî wa qurodi qua ke qkû qkâi-vhuâs ara au-xina, zî qkhein wan dehana rgou-rgou,
zì ku ke via, und they went oul. cua, verb, act. trans. indic. past. tense. plu. 3ral pers.

zì qkhein wan, and places all. vean allj, pron. agrecing with the nom in mum., gen, and casc.
duba, al.
sa-verou-viou heating. present participle.

## Exones xx. 1-li.

## THE TEN COMMANDMEATS.

1. Op ke Eloba ne midi wadi ke kuba, zî ke mi,
2. Tita ke a Qkhuta za Elota, hîa Egheipte qhuba ghu, qkai-omi ghu, u-vuaghazi-hâ.
3. Ckhara Elokaz ke ti-eiqâ uhâ tite.
4. Qkauihâ ip, zî iï ghariï chumi qua qkurika hâ ghun gha, qhup vama quaka hâ ghun kori, xkamka qhup quaka qua hâ ghun zîn ghaz ke tazi dibasin titi.
万. Xnan eiqâz ke qhunsin titi, zîz ke sisinban titi, Tita Qkhuta sa Elota ke a ôâsa Elota, hea xkun di
5. Op ke Filoba. and Giod. O has the signification of then. ke the temporary predicate. Eloba put in the ace. because in apposition with $p$, the personal affix. This construction has been explained above.
Ne midi wadi ke kuba, these words all spake. ne demonstratire pron. undec. because placed belore a noum; wadi, adj. pron. dec. when following a noun. Agrecing with midi, words, in gender, number, and case. ke kubla, v. Active transitive form, Indic. past tense.
Zì ke mi. and said. mi agrees with kuba.
6. Tita ke a Qhhuta sa Elota. I and the Lorll I thy God I. Fe a the substantive verb. The pronoun is repeated twice by means of its pers. affixes. This is a peculiarity of idiom which the genius of the language requires.
hîa Eghcipte qquba ghu; that Egypt land from, lía is the Relative pron. undec. quabea gor. by ghe in the obj. c.
$\mathrm{q}^{\text {kaia-omi ghe the bondage house from, qkai-omi, from omi, a house, }}$ and glai to bind.
u-ruaghazihit. have brought thee $q$ p. $\tau$-ruagha from $u$, to take, and vungha, to come out. Zi the personal affix of the and pers. pron. obj. c. The verb is in the intransitive form. indic. pres. literally means, am bringing thee up.
7. Ckhara Elokiz, Sce other gods before me thou have not. chihara, see p. 33. lie the temporary predicate. The negative future, H
rkhabap ckon vama ra xkui, quona-xêi zi haka-xêi suriba qua, xuan xkhantihâı gha;
8. Zî kei-rgou-disin xêin cnamtihûn, zî qkhâi-kumcli ada ra sâun gha, ckhumsara $\times$ Rou.
9. Cuns (Qkhup sa Elop dis êz ke xousi kuba-u titi, Qkhup ke chabi-osi qkuâbi titi, hìa xêip cunsa xousira kuba-uba.
10. Sabat-zeba vêi-vêi, îz qanu-qamubi.
11. Qnani zedi eiz keni chumrebasin, そî sisins was âza di.
as indicated by the negative form tili. See p. 45. li-cium. $t i$ is here used as a possessive pron. with the prep. eiqa lefore.
12. Qkauihâ ip. A cut likeness. ip a likencss or image from $i$ to be. qkauihut. cut. perf. part. pass, hé chauged into $i$ for the sake of euphony, and the particle ra omitted.
7ì ii gharii. and ianaye not any. ip changed into the com. gen. because indefinitc.
chumi qua, \&c. heavens above are things of. the prep. gne requires to be nearest the nown which it governs.
ghup vama quaka hâ ghun kori, the earth upon beneath are things also.
xkamke qhup quaka qua lầ ghun zîn ghaz. waters carth unter in are llings and of. No Relative pron. being employed, the second nown and pronoun require to be placed between the antecedent noun and the pron. by which it is governed. Zin, the aflix 3 pers. plur. nom. joined to the conjunction to agree with ghen. On the same principle as $t a$ is repented in vs. 2. ghaz. aflix of the 2 ud pers. pron. joined to the preposition. ke tazi dibasin titi, never mate for thyself nol. lazi, never, addls to the force of the prohibition. dibasin. the compound liclative, Reflective form. $d i$, to make, $b a$, for, sin, one's self.
13. Xuan eiqâz ke qhunsin titi, Those before thou bore not. The demonstrative pron. declined in the absence of a noun expressed. the pers. pron. affixed to the preposition. qhensin. the Reflective form bow thyself.
Ziz ke sisinban titi. and thous serve them not. sisinban, the Relative form, to serve for.
14. Ghabi hû-xêi zep ke Qlhup sa Elop sabbata, xêip ci\% ke tazi sisin titi, saz, sa ôap kori, sa oàs kori, sa qgap kori, sa qgas kori, sat guman kori, sa omi-amka qua hâ cu-khoi âz kori.
15. Quani zedi cip ke Qkhuba chumku kori, qhup kori, hurip kori, zî xêin qua hâ ghui-wai a-ke kuru, ̌î hu-xề zeba ke sâ, xna-amakap ke Qkhuba sabatzeba ke ckhai zî ke qanu-qanubi.

Tita Qkhuta, \&c. I the Lorl 1, sce The pers. pron. appears four times in this sentence.
hea skun di whabap ekon vama ra xkui, that the parents of aie i edness children upon do lay. Tita is the nom. to ta xkiwi. $r a$, the sign of the present tense.
quoua-xêi zì laka-xêi suriba qua, the lhird and fourth generation to.
Anan xkhantihan gha, those that lute me of. athan hate, ti, me, han, they are. By this construction the relative pron. and ru, the sign of the pres. tense are dizpensel with, and a participial noun substituted.
6. Zì kei-vgou-disin xêin cnamthan, and thousands those loving me, the numeral arlj. pron. and participial noun agree in number and gender.
Zì qkhâil-kumdi âda ra sâun gha. und commandnients my they kieping of. "ulla abbreviated form of poss. pron., saí to keep, preserve; $n$ the 3 personal aflix.
ckhumsara xkou. mercy do shoov, or showing mercy.
7. Cuns Qkhup sa Elop dis. The name of the Lord lhy God's. the gen. is here expressed by the prep. di of; the pers. affix fem. gen. is joined to it to agree with chns.
iz ke xousi kuba-u titi. thon illly use in speech shall not. $i$ is a particle inserted for the sake of euphony, as $z$ could not have been joined to the final $s$ of the preceding word. If this were not cmployed the sentence might stand thus-" $Q^{k} / h u / 1$ sa Elop de cunsaz" kuba-u, to use in specelh, from kulla to speak, and $u$ to takc.
Qkhup ke chabi-osi qkuabi tili. the Lord ucithout fault count hine
12. Sa xkûp zî sa xkûsa amaba-ma, êka zcka àza vkuivkuibazi, Qkhup sa Elop ta mazi qhup ci.
13. Qkamz ke titi.
14. Ceiz ke titi.
15. Caz ke titi.
16. Amadama qkho-qkâizz ke sa cku-khoip vama qkhoqkî̀ titi.
acill not. chabi, fault, osi, without, li the objective pron. placed next to the root of the verb.-Sce pare 45.
hia xeip cunsa xousira kuba-uba. that his name idly uses in speech. cunsa obj. governed by kularal. ba the 3rd pers. affix obj. sing. to agree with $l i$.
8. Sabat zeba vêi-về, êz qanu-qamubi. the Sabbutll-day remember, that thou hallow it. $\hat{\imath}$ has the force of that.
9. Qnani zedi ciz keni chumebasin. six days upon thou shalt labour. $z$ joined to the prep. chumrebasin, the relative-reflective form, future tense Imperative Mood.
zì sisins was îza di. and teork all thine do. was, adj. pron. agrecing with sisins in gen., num., and case.
10. Ghabi hû-xei zep, Sc. But the seventh duy, soc. the definite article is expressed by the mas. termination $p$ in $z e p$. Salaba, obj. case in apposition to $z e p$.
xêip ciz ke tazi sisin titi. hime upon thou not work shath not. tazi and tili form a double negative equivalent to not by any means, or not on any account.
saz, sa oîp kori, Se. thou, thy son or fec. kori unlike kith does not require any sign of gender.
sa omi-anka qua hâ cu-khoi âz kori. thy yates in is stranger thine or. sa and $a z$ are the two different forms of the poss. pron. Omi-amka, literally; housc-moulls.
11. Qnani zedi cip ke Qkhuba, Sce. Six days upoon he dide the Lord, sc.
12. Sa skîp zî sa xkûsa amaba-ma. thy fulher and thy mother gice honour. Two uouns joined by a conjunction, governed by an
17. Sa cku-khoip omiz ke dura titi; sat cku-khoip tatasaz ke dura titi, xêip qgap kori, xêip qgas kori, xè $\bar{p}$ ) gumap kori, xềp qkori-hap kori, zî ghuï gariï, sa cku-khoi di.
active verb, the last only put in the obj. ainabe-ma, literally to give truth.
13. Qkamz ke titi. kill thon shalt not. Imperative Future ke though a sign of the Past Tenses, is often used both in , the Pres. and Fut. as im expletive.
16. Amadama qkho-qkîs, Sic. a false zoitness thou thy neighbour upon wiluess shall not.

## 'IHE LORD'S PRAIER.

Sida îzi, chumku qua hâzi, sa cuns as qamu-qamuhê, sa gau-qhup ap hare, sa vêis as ire, chumi qua kmi, xuadi on qhup ei ; wa zedi ci vhâdahâ vuna madare,

Sidu îzi. Our Iather. Sida, the lst poss. pron. plur. com. gen. it is the exclusive form which is always used when addressing a third party not associated with those speaking. izi the roc. case of îp.
chumku qua hâze. heavens in art. the voc. case of the 2ud pers. pronoun is affixed to the verbl $h \vec{k}$, to be, to govern it.
sa cuns as qumu-quanhê. thy name let her herllowed be the sign of the olj. case in cons is elided, because it is immediately followed by another vowed in dis, let, skeeps up the prouminal concord betwecn cens and as. qanu-qainthe, the imp. mood pass. 3rd perz.
sat gan-ghup ap hare. thy limglom let him come. re is often offixed to verbs in the imperative mood, it is a particle denoting cither carnest supplication or impatient entreaty.
sa vêis as ire. thy will let her be done.
chumi qua kmi. hearen in as. Kimi from $i$ to bc , and kaman like.
xnadi on chup ei. so also earth ou, ei governs a nom. case.
wa zedi ci. all days on.
vhâtahâ vma madare. need ce are food give us. vhâdahtâ, verlb act. Intransitive form. Indic. pres. plur. num. lst pers. $d a$ is the pronominal affix. da in madare is the ace. plur. of the lst pers. $\hat{\mathbf{c}}$ sadia xorema cubada. aud our sins foryive us. cuba, to forgive, is the relative form of the verb cu, not to know, and means literally to le ignorant of for, lience to forgive.
sida on surute-dahan-ara cuba ghasi. we also ore us they that do forgive as. surute-lahan-ara is abbreviated for xein héa sida surutihan ikla ra, \&e., they that us owing are we do, \&c. If

E sida xorena cubada, sida on surute-dahan-ara cuba ghasi; $\hat{c}$ xeiba ghu oreda, sadip ke graughuba, zî cgeiba, zi keisiba, camop qua. Amai.
the sentence lad not contained the particle on, it might have been still further abbreviated into suruti-dahun idara, 太c. c xeibs ghtu orcila. and cvil from sace us.
sadip, ke gatu-qhuba, Sc. thine is the fingilom, 太c. gan-qhula, cgeiba, and keisiba are in the obj. case because in apposition with $p$ in sadip.
