

Reports

St. Alban's College. P.M. Burg. October 26th, 1891.

To Prince Dinuzulu kaCetshwayo of KwaZulu  
at St. Helena. Ndabezitha!

Mjwapuna brought to me Nkentshane and Tshokotsho from KwaZulu being sent to report about OkaMsweli who is still sick with eyes trouble. Somukele did not bring the herbalist. If we try and prick her eyes, many things like fluff come out of her eyes. We are very worried about her. Mahlohlwana did not come because he is the Boer's police. They are also reporting about ten bulls and ten goats from Mjwapuna's place that died. We were very glad to see the letter you wrote to Nkosazana, and the words of the Bishop of St. Helena who thanks for your coming and loves you very much. That is very good my Lord's children if you obey the Queen's orders who is your grandmother and grandfather, also, and those who look after you for her. The Bishop would not express his gratitude if your conduct was bad, but he thanks you because you are behaving very well, you respect, and your respect proves that you were born by the King who was the ruler of us all who are black. All the Zulu people are very happy to hear that our King's children are listening to the Queen's words.

We have a white man from Johannesburg Diamond Fields who is doing wonders. He awakens people who have been sleeping for many years because they were sick and powerless. He has awakened two Europeans in a very short time, about half an hour. But it is painful that he does not cure the black people, it is the Europeans only. He is selling his medicines costing three for a shilling. The doctor took out a bullet from Maxegu's wound and we are hoping that he will recover soon. Ndabezitha ! Extend my kind regards to all the members of the royal family and father Radebe. His daughter and child are still here.

Magema Magwaza.
