December 2004

5 January 2004. the first 'working day' of the year. Xmas + New Year melt into a mess of writing, shopping, meal making. Did not go down to the beach but walked/jogged along Margrove, skimming up Francois, walked through the University and across about 1 hr 20. And I slow down, jogging strictly level if there's the slightest incline. The book continues, indeed it has snafu, some of the set pieces are written out. It now needs more research. The problem will always be readability and the market - can it ever be more than a specialist's book?

4 January 2004 Read the ManlyBoke's Giving & Receiving. Full of interesting information, a marvelous turn of phrase, many of the pertinent themes of SIT's Medical History, of the conflict between medicine and, what does he call it? 'indigenous therapy'? His answer - he tolerates but when good sense - and to others I can't remember - then act. But do I want to go to Oxford?

30 Dec 2003: the great paddle ski trip. went down early to the ski rowing club - my second paddling venture - going down the freshwater channel - three paddle skis with 3 girls paddling parallel - turned right and met up with them again near the hump - on their way to 'the swamps' using the mangroves - explained how to use paddles + how to cross the channels - I was much slower, heavier, and they continually pulled ahead - but magnificent - the shallows by - the water was no swamps alive - the girls friendly, instructive, surprisingly gossipy, we discussed her hair tinting policy while in the curve of the mangrove shallows, on return they were too far ahead and I did not see them again I but I think them here because I would not have the knowledge or the courage to do it myself.

Structure - music's move. is one in its
totality - production, business, politics,
law, all have to be adapted - they
create each - for links - with other states -

Then the change - a part of a large society
- as with feudal king - the transference
of allegiance - to monarch

All these are easy with a state structure

1) Claim to the land:
attitudes to land: }

- Secular } study
- Agrarian }

2) T.S. Locusts Law

the reality at the core of the world - but it is not nature - it is
adapted to a fearful society. - This theme must be played out

Here's a continuity / given the demands of economy,
and the need for control, must turn to the chief,
- i.e. not interfere with them. The abrogation passage -
Gray takes the Lord Commission & puts it a
step further. Why is this not responded to on its
arrival in PMB? → Because RI say so in Moly
